DeASI Release Attestation — V1.0.3.5

Document Generated: August 14, 2026

Attestation Timestamp: June 29, 2026 at 03:24:37 UTC

Verification Status: ✓ Sigstore-Verified (GitHub Fulcio + TSA)

☒ Release Identification

Field	Value
Repository	RichardPatterson121/DeASI
Tag / Version	V1.0.3.5
Package URL (purl)	pkg:github/RichardPatterson121/DeASI@V1.0.3.5
Subject Digest (SHA1)	c3c3e7b6eec7398e4db5f1a03b9230364268e941

☒ GitHub Registry Identifiers

Identifier	Value
Database ID	346051061
Owner ID	284057696
Package ID	1081020718
Repository ID	1081020718

☒ Cryptographic Verification

Attestation Specification

- **Statement Type:** in-toto Statement v1
<https://in-toto.io/Statement/v1>
- **Predicate Type:** Release Attestation v0.2
<https://in-toto.io/attestation/release/v0.2>
- **Payload Media Type:** application/vnd.in-toto+json
- **Bundle Media Type:** application/vnd.dev.sigstore.bundle.v0.3+json

Signature & Certificate

- **Signature Scheme:** DSSE (Dead Simple Signing Envelope)
- **Signature (Base64):**
MEUCIQCqRIQQ3tFVi2J0snD5GemXZaB+f0rciGaXIsslR8FWQAIgHtT0jZ1bOLtDSEar6VbAWq35VQtGtQn51D/omIoYj4c=
- **Certificate Issuer:** GitHub, Inc. (Fulcio Intermediate 11)
- **Certificate Subject:** Attester
- **Certificate Validity Period:** June 12, 2026 – June 12, 2027
- **Certificate Constraints:** Code Signing (id-kp-codeSigning)

Trusted Timestamp

- **Timestamp Authority:** GitHub TSA (RFC 3161 compliant)
- **Signed Timestamp:** June 29, 2026 at 03:24:37 UTC
- **Timestamp Certificate:** GitHub TSA Intermediate

✓ Provenance Guarantees

This attestation provides the following supply-chain security guarantees:

1. **Source Integrity** — The SHA1 digest c3c3e7b6eec7398e4db5f1a03b9230364268e941 cryptographically binds this release to an exact Git commit.
2. **Publisher Identity** — The Fulcio-issued certificate ties the attestation to a verified GitHub identity, preventing impersonation.
3. **Temporal Proof** — The RFC 3161 timestamp from GitHub TSA provides trusted, non-repudiable evidence of when this release was published.
4. **Tamper Evidence** — The DSSE signature ensures the payload has not been modified since signing. Any alteration invalidates the signature.
5. **SLSA Compliance** — This attestation conforms to SLSA (Supply-chain Levels for Software Artifacts) requirements for build provenance.

🔍 Verification Instructions

To verify this attestation using Sigstore tooling:

```
# Verify the bundle with cosign
cosign verify-blob \
  --signature <signature-file> \
  --certificate <certificate-file> \
  --certificate-identity-regexp '.*' \
  --certificate-oidc-issuer 'https://token.actions.githubusercontent.com' \
  <blob-file>
```

Or use the full bundle:

```
cosign verify-blob --bundle DeASI-attestation-bundle.json <artifact>
```

📄 Attestation Summary

Property	Value
Project	DeASI (Decentralized AI System Interface)
Version	V1.0.3.5
Release Date	June 29, 2026
Attestation Standard	in-toto + Sigstore
Trust Root	GitHub Actions OIDC → Fulcio CA → GitHub TSA
Verification Status	✔ Valid

This document is a human-readable summary of the Sigstore attestation bundle. The original JSON bundle contains the complete cryptographic material for programmatic verification.

Source Bundle: file-1.json (Sigstore Bundle v0.3+)

Extracted By: Automated attestation parser

Report Date: August 14, 2026
